- A. LegacyId is not used for a new element.
- B. LegacyId holds an installation-specific identifier.
- C. LegacyId is assigned a value later by the system.
- D. LegacyId holds the same value as the ID property.

Answer: A

QUESTION 11

You need to set the permissions of an action menu item. Which property should you modify?

- A. WebSecureTransaction
- B. NeededAccessLevel
- C. ConfigurationKey
- D. Linked PermissionType

Answer: A

QUESTION 12

You need to set up the context for an extensible data security (XDS) policy. Which security element should you use?

- A. Permission
- B. Duty
- C. Role
- D. Privilege

Answer: A

QUESTION 13

You need to add a conditional statement into a query object.
Which class should you use?

- A. QueryItem
- B. QueryBuildDataSource
- C. Query
- D. QueryRange

Answer: A

QUESTION 14

You have two tables named Table1 and Table2.
There is a many to one relationship between Table2 and Table1.
You discover that following X++ statement is very slow to execute;

```
select recid from table1  
join table2  
where table2.RefField == table1.Field;
```

Table1Field cannot have duplicate data in Table 1
You need to reduce the amount of time it takes for the code to execute.
What should you create?

- A. A unique index in table 1Field and a unique index in table2.refField
- B. Anon-unique index in table 1Field and a unique index in table2.refField
- C. A unique index in table 1Field and a non-unique index in table2refField
- D. Anon-unique index in table 1Field and a non-unique index in table2refField

Answer: C

QUESTION 15

You are developing a class named Class1 that performs several calculations.
One of the methods in Class1 is named method 1.
Other developers will create classes that inherit from Class1.
You need to ensure that method1 is available to Class1 and to all of the classes that inherit Class1.
The developers must not be able to call method1 from any other classes.
Which keyword should you use to define method1?

- A. Protected
- B. Public
- C. Server
- D. Private

Answer: D

QUESTION 16

You need to identify which permission can be set only on a form that has date effective data.
Which permission should you identify?

- A. Correct
- B. Create

- C. Delete
- D. Read
- E. Update

Answer: D

QUESTION 17

You have a Dynamics AX development environment.
You need to delete the data in a specific table manually.
What should you use?

- A. The Type hierarchy browser
- B. The DeleteActions of the table
- C. The Code profiler
- D. The Table Browser

Answer: A

QUESTION 18

You need to identify which elements a job can contain.
Which two elements should you identify? Each correct answer presents part of the solution.

- A. Embedded methods
- B. Variable declarations
- C. Class instantiations
- D. Events

Answer: BC

QUESTION 19

You have a table named Table1 that contains the information from a sales invoice.
For Table1, you need to create a method named TaxAmount that will return the total amount of tax for the invoice. The method will be used in a report to show the tax amount information.
Which type of method should you use?

- A. Static
- B. Accessor
- C. Main
- D. display

Answer: C

QUESTION 20

You need to develop a solution to process accounts receivable.
The solution must halt the process and display a message if the process starts before the last day of the month. The process must resume once the user acknowledges the message.
Which communication statement should you use?

- A. Warning("This process should only be started on the last day of the month");
- B. Info("This process should only be started on the last day of the month");
- C. Box:warning("This process should only be started on the last day of the month");
- D. Error("This process should only be started on the last day of the month");

E. Print "This process should only be started on the last day of the month";

Answer: C
